## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 12, 2003 has been entered.
2. Claims 17-25 have been added.
3. Claims 8-25 are currently pending.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/37874 in view of US Pat. No. 5,229,418.

WO '874 teaches a method of treating or preventing inflammation of the gastrointestinal tract caused by *Helicobacter pylori* infection using astaxanthin (see page 2, lines 20-29). WO '874 teaches using astaxanthin esterified with fatty acids isolated from *Haemactococcus* sp. The astaxanthin is administered with carbohydrates and antioxidants (see page 3). The astaxanthin is administered is 0.01 to 10 mg per kg body weight (see page 4, lines 13-16 ).

Art Unit: 1654

The reference does not specifically teach that treating the *H. pylori* infection also treats or prevents indigestion or treats the symptoms of indigestion. However, US '418 teaches that *H. pylori* infections also cause indigestion (see column 1, lines 33-37). Therefore, a person of ordinary skill in the art would reasonably expect that the method of treating or preventing gastritis caused by *H. pylori* infections using astaxanthin taught by WO '874 would also be useful in treating or preventing indigestion associated with *H. pylori* infections. Thus, based on this reasonable expectation of success, an artisan or ordinary skill would be motivated to use the astaxanthin taught by WO '874 to treat or prevent indigestion and to treat the symptoms caused by the indigestion itself.

5. No claims are allowed.
